Problem Statement

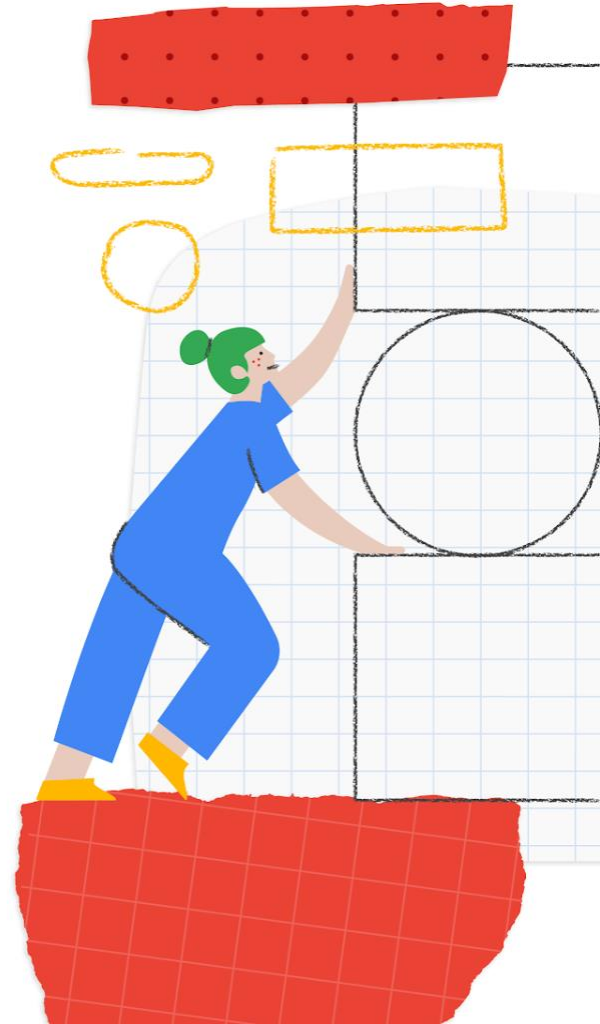

- What problem are you looking to solve?

People with disabilities often face issues finding jobs due to their reservations. Therefore, there is a need for an inclusive job portal that caters specifically to their needs by providing accessible job listings, employer support, and other necessary assistance.

Product Idea

- **How does your Product solve the problem?**

An exclusive portal designed for people with disabilities.

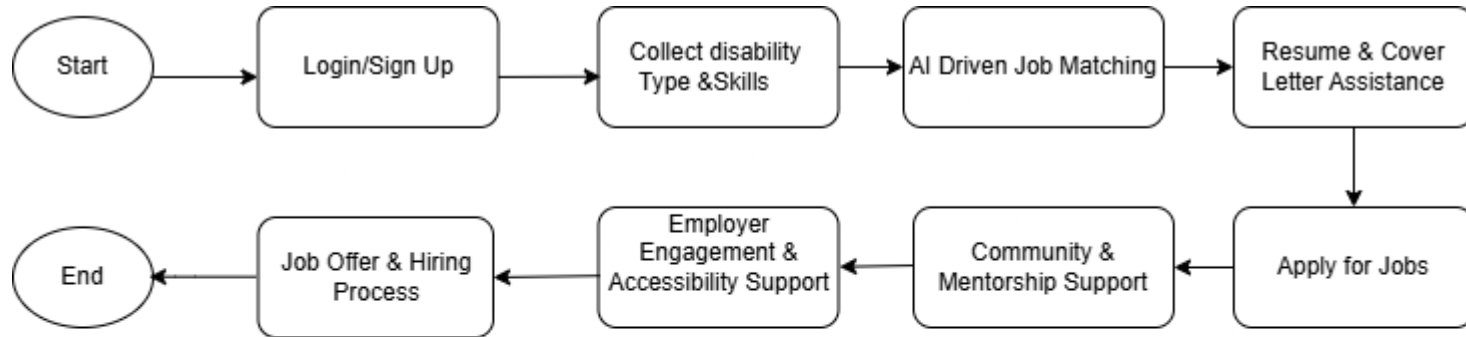

This job portal collects the disability type of each individual and provides job offers exclusively tailored to them. It also includes other job opportunities that align with their abilities and qualifications.
